"Upgrade to Our Smart Looking Modular Electronic Racks"

Has a positive clip in action that holds the EMU firmly in place. Looks very smart and modern with built in Power "On" Key and "Nip Count Reset" Key, all integrated into the one easy to install unit.

Modular Electronic Racks

Electronic Rack Installation Notes

- # Systems are fully wired and tested.
- # Never drill through "Plastic Part of the Electronic Rack"
- Use existing screw holes or screw into the shaded area shown above.
- # Only require mounting and connecting to power supply.
- # Clip on EMU's when the system backboard is mounted.
- # Never allow shavings or swarf from the installation to enter the top of the EMU's.
- # The systems must be mounted square and plumb.
- # *Mounting height from floor approx 165cm or at eye level with reference to the digital displays in the front of the EMU.*
